REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The best prior art of record is Callender et al (2002/0147657). Callender shows a system of maintaining inventory for a physical retail store which also sells its items via the internet. It shows providing inventory readings to the web server periodically (e.g., daily), and providing an estimate of inventory in stock at a particular time. In Callender, the estimate is provided by taking the last inventory numbers provided to the server and updating them by an estimate of the number of items sold. This estimate is provided based on historical sales data.

Callender (as well as the rest of the prior art record) fails to show the following elements of the present independent claims 1, 11 and 12:

- determining *real time* [emphasis added] approximate inventory quantity
- adjusting the real time approximate quantity by a quantity-held estimate representing items that have been physically removed from stock by shoppers prior to checkout
- comparing the adjusted quantity to a first threshold.

Callender never considers the concept of the quantity physically removed from stock prior to checkout, or modifying a real time approximate quantity. Since these elements are not shown in Callender, or any other prior art reference, the claims are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee.
